5 WAYS TO SAFEGUARD YOUR MEDICATIONS

① DON’T TELL MANY PEOPLE ABOUT YOUR MEDICATION TYPES.
Keeping your prescription types private may help in preventing unwanted attention to your medications. Not telling others about your medications will also keep your medical problems private.

② DON’T GIVE MANY PEOPLE ACCESS TO YOUR MEDICATIONS.
Minimize the number of people who help you with your medications.

③ KNOW HOW MUCH MEDICATION YOU HAVE.
Do a routine count of your medications on a regular basis to make sure none are missing.

④ DISCARD UNUSED MEDICATIONS PROPERLY.
If your treatment is complete or you are not using certain strong medications any longer, properly discard them to reduce the amount of medications in the home.

⑤ LOCK UP YOUR MEDICATIONS.
Keep your medications locked up. Medication lockboxes are a good way to keep strong medications secure at home.
